

Civil Geo-tech & Mining Contractors

Application

The Alterrain Health & Safety Plan is designed to provide a management strategy framework to effectively ensure management of all significant health and safety risks on projects.

Each section of this plan is to be used to prepare for and monitor the progress of safety during a project. Each section must be completed to develop a site-specific plan that will be implemented for the particular project.

Workplace Health, Safety & Environment Management Statement

It is the policy of Alterrain to provide and ensure that the workplace and working environment is safe for all personnel and subcontractors at or in the near vicinity, and is without risk to the natural environment.

To meet these objectives, a systematic and planned control system for health, safety and environment management will be implemented on each contract.

To contribute to the successful outcome, all supervisory staff, as part of their job responsibilities shall be fully familiar with the Alterrain Health, Safety and Environment Management System Manual.

The issue and use of this Workplace Health and Safety Plan is issued with my authority. All personnel employed at this Workplace shall perform their duties in accordance with the requirements of this Plan and in compliance with company procedures and Workplace specific Safe Work Procedures.
